

UHF True Diversity Digital Pilot Stage Wireless Microphone Series

UHF真分集、自动选频、数字导频

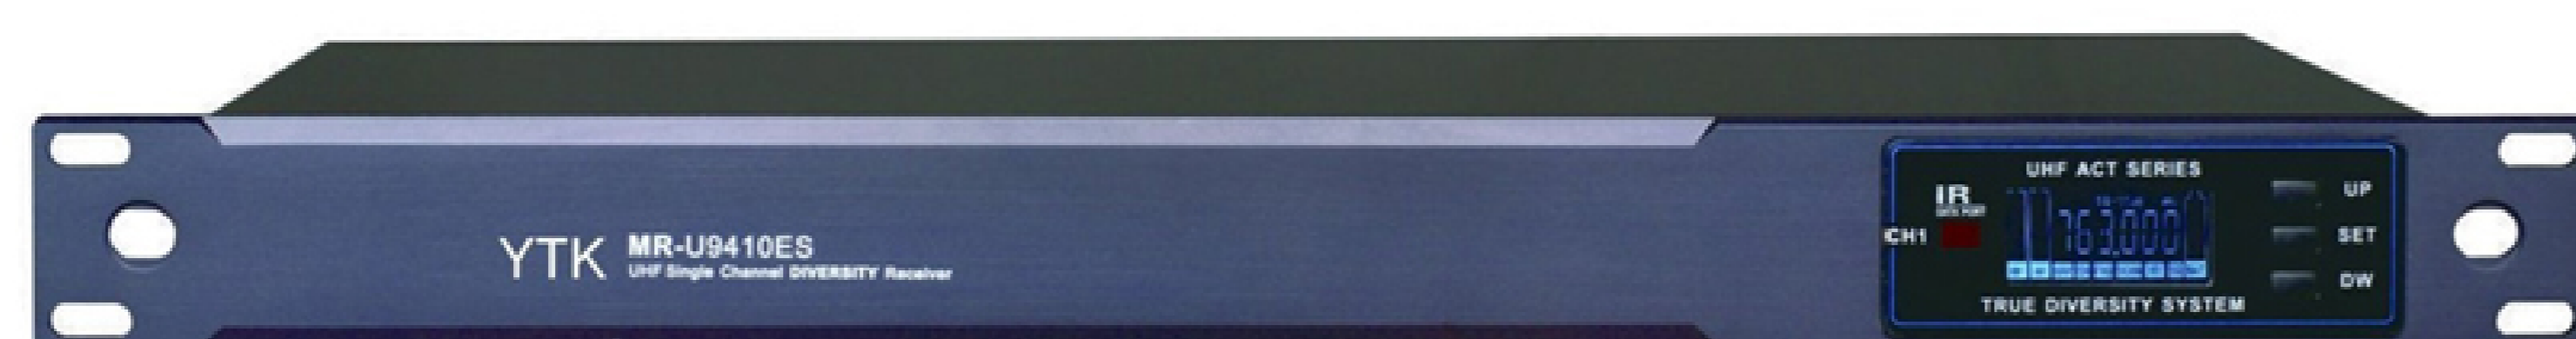

专业演出无线麦克风

YTK INNOVATION系列全新一代无线麦克风能够驾驭于任何高压力的专业演出，而且人性化，智能化功能和灵活特性，以及绝无仅有的音质为音响专业人士提供必备条件。

YTK INNOVATION series professional wireless microphone exceed the kind of high-demanding stage performance, Humanized、Intellectualized function and the unique sound quality for sound installation and working bands.

- Up to 1000 preset frequencies, the system can comes with three optional transmitter: Handheld. Bodypack. Table microphone.
- Use up to 4 simultaneous system—all channels compatible.
- Automatic frequency scanning, Automatic transmitter setup.
- True diversity operation for increasing reliability.
- Receiver feature: SQ. Battery status. RF. AF. Frequency Diversity active channel.
- Intellectualized digital Pilot Tone & Noise Lock circuit, ID frequency Code system for avoiding interference mostly.

Receiver:
YTKMR-U9410ES

可配套发射器 Available Matching Set

MR-U9410ES SET A1	MR-U9410ES SET A2	MR-U9410ES SET A3
<ul style="list-style-type: none"> • 1接收机+1手持发射器 • 1Receiver+1handheld transmitter 	<ul style="list-style-type: none"> • 1接收机+1腰包发射器 • 1Receiver+1Bodypack transmitter 	<ul style="list-style-type: none"> • 1接收机+1会议麦克风 • 1Receiver+1Meeting transmitter

MR-U9410ES 接收机

频段:	UHF600-814MHz
频道总数:	100组
工作方式:	PLL锁相环回路
动态范围:	>110dB
失真度:	<0.5%
频率响应:	50Hz-20KHz±3db
信噪比:	>90dB
有效使用距离:	>60M
电源供应:	DC14-22V 500mA
音频输出接口:	1*6.3mm 混合输出 & 1*XLR平衡输出
接收机原理:	真分集
产品尺寸:	480*221*45mm

MR-U9410ES Receiver:

Carrier Frequency:	UHF600-814MHz
Channels Total:	100
Oscillation Mode:	PLL Synthesized
Dynamic Range:	>110dB
T.H.D.:	<0.5%
Frequency Response:	50Hz-20KHz±3dB
S/N Ratio:	>90dB
Effective Use Range:	>60M
Power Supply:	DC14-22V 500mA
Audio Output Jack:	1*6.3mm mix output & 1*XLR balance output
Receiver type:	true diversity
Product size:	480*221*45mm

STAGE Wireless

YTK INNOVATION series ,MERES unique true diversity technology ,completely reduce signal drop-out ,fully increase the system stability ,Intellectualized digital Pilot Tone & Noise Lock circuit ,which also makes receiver is able to monitor the transmitter battery status as well ,and more ,each channel has different ID frequency Code system what increase the quantity of compatible system .Digital SQ adjustment ,it is subjected to adjust according to requirement of project. This series' s receivers may come with optional transmitter such as handheld ,bodypack and table for different applications. Wider frequency response ,better dynamic range and low T.H.D for this upgraded system which exceed the kinds of applications such as stage, meeting ,speaking etc !

YTK INNOVATION系列，独创的真分集电路。全面地减少信号盲区，大幅度地提高使用稳定性，此系统采用智能数字导频电路，接收机可实时检测发射机电量，可实现每个通道不同的ID代码，增加叠机使用的数量而绝不影响使用稳定性，内部数字SQ设置，可根据工程需要，实时调整。创新一键自动搜索在有效使用范围内不受干扰频点，并一键将接收机频点和发射机频点同步，接收机可同时搭配手持式，腰包式或会议座式发射器自由使用，提高工程使用及安装灵活性，接收机每个通道独立模组设计，可对模组进行独立维护或维修而不影响其他通道工作，同时更宽的频响，极好的动态响应及高保真音质，可胜任于演讲、会议及专业演出使用。
